

Enterprise - SAML / Kerberos

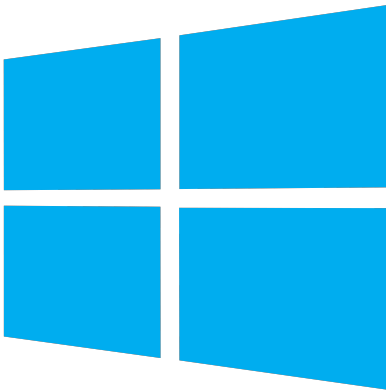

Our Enterprise app contains features for SAML and Kerberos SSO and Cloud User Provisioning. [SAML](#) allow you to use an identity provider, like [Okta](#), [AzureAD](#), [AD FS](#), [Google GSuite](#) and many more to authenticate Atlassian users. With [Kerberos](#) you can remove passwords and login screens in Atlassian completely, and automatically authenticate users on trusted networks. - help you managing the set of users who should have access to Atlassian products.

Marketplace listings:

- [Kantega SSO Enterprise - SAML / Kerberos for Jira](#)
- [Kantega SSO Enterprise - SAML / Kerberos for Confluence](#)
- [Kantega SSO Enterprise - SAML / Kerberos for Bitbucket](#)
- [Kantega SSO Enterprise - SAML / Kerberos for Bamboo](#)
- [Kantega SSO Enterprise - SAML / Kerberos for FeCru](#)
